

6. Applications

6.2 Automation

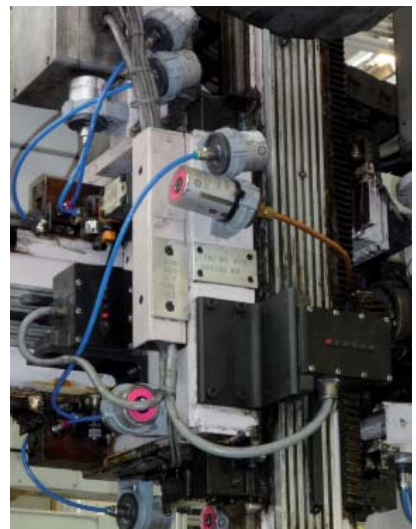

In the automation industry, lubrication points are frequently lubricated by simalube.

Control shaft and track of a loading system lubricated by simalube 60ml units.

*Image left and right:
The lubricant is guided to the lubrication point by a tube.*

6. Applications

6.2 Automation

simalube lubricates an unloading-robot on a plastics injection machine from Sepro.

Detailed image of a simalube 125ml on a double column loading system.

The end of a track on a double column loading system is lubricated by a simalube 125ml.
